

Website Structure – DKGZ Deutsche KFZ-Gutachterzentrale

Core Concept

The website must answer three questions within a few seconds:

1. What does DKGZ offer?

Referral of suitable automotive assessors from a nationwide partner network.

2. What does the customer need to do?

Select their request, enter the location, and submit a free inquiry.

3. What happens afterwards?

The request is automatically forwarded to suitable assessors. An assessor accepts the request and contacts the customer.

The website should feel like a **serious, centrally organized point of contact**, rather than a traditional comparison or lead-generation platform.

The primary CTA used consistently throughout the website should be:

Find an Assessor

Important:

Submitting a request and being referred through DKGZ is free of charge for the customer.

Any costs associated with an assessment service that may subsequently be commissioned are separate from the DKGZ referral service.

1. Header

Left:

DKGZ logo

Navigation:

- Services
- Locations
- How It Works
- About DKGZ
- For Assessors

Right:

0800 XXX XXXXX

[Find an Assessor]

On mobile:

DKGZ Logo | Phone | Menu

Optionally, a compact CTA can remain permanently visible at the bottom:

Call | Find an Assessor

2. Hero

Find an Automotive Assessor Near You

We quickly connect you with a suitable automotive assessor from our nationwide partner network.

[Enter postal code or city] [Find an Assessor]

or

Call free of charge: 0800 XXX XXXXX

Directly underneath:

- ✓ Free inquiry**
- ✓ Nationwide network**
- ✓ Fast referral**

A high-quality, professional image of a vehicle or automotive assessor can be displayed on the right-hand side.

3. Services

Which Service Do You Need?

Accident Damage Assessment

Find an assessor following a road traffic accident.

Find an Assessor →

Vehicle Damage Assessment

Have vehicle damage professionally assessed.

Find an Assessor →

Vehicle Valuation Report

Have the value of a vehicle professionally determined.

Find an Assessor →

Vehicle Valuation

Professional valuation of a vehicle.

Find an Assessor →

Below:

View All Services →

Do not display too many services at once. Show the most important services first and provide a separate overview for additional services.

4. How DKGZ Works

The Referral Process Is This Simple

01 – Submit a Free Inquiry

The customer provides their request, vehicle location, and contact details.

02 – Match a Suitable Assessor

The request is automatically forwarded to suitable automotive assessors within our network.

03 – Assessor Accepts

An available assessor accepts the request and contacts the customer.

[Find an Assessor Now]

Below:

Free Inquiry · No Customer Account · No Waiting for Quotes

5. Accident Section

Been Involved in an Accident?

Quickly find a suitable automotive assessor in your region.

[Find an Accident Assessor]

or

0800 XXX XXXXX

Submitting an inquiry and being referred through DKGZ is free of charge.

This section may be visually emphasized slightly more, as accident-related assessments are expected to be one of the key services.

6. Locations & Germany Map

Nationwide Network. Regional Referral.

A **professional map of Germany** should be integrated here as the central location feature.

The map displays all cities and regions where partner assessors are currently available.

[Enter postal code or city] [Find an Assessor]

Subtle location markers should be displayed on the map.

When clicking a location, for example:

Düsseldorf

Automotive assessors available

- Accident damage assessments
- Vehicle damage assessments
- Vehicle valuation reports
- Vehicle valuations

[Find an Assessor in Düsseldorf]

Important cities can be linked below the map:

Berlin · Hamburg · Munich · Cologne · Düsseldorf · Frankfurt · Stuttgart · Dortmund

View All Locations →

Technical Requirement

The map and location pages should use the same central database.

When a new partner assessor is added to a region, the corresponding location should be able to be activated automatically.

Example pages:

`/locations/duesseldorf/`

`/locations/duesseldorf/accident-assessment/`

`/locations/duesseldorf/vehicle-valuation-report/`

`/locations/munich/`

All location and service pages should be managed through **central templates**.

Changes to layouts, general copy, or CTAs should therefore be applied simultaneously across all corresponding pages.

The following information should be individually configurable for each location:

- City
- Federal state
- Postal code areas
- Available services
- Partner coverage
- Surrounding cities
- Local content
- Local FAQs
- SEO data
- Indexing active/inactive

7. Why DKGZ?

One Central Point of Contact for Finding an Assessor

Free Inquiry

Submitting an inquiry and being referred through DKGZ is free of charge for customers.

Central Referral

One inquiry instead of having to contact multiple assessors individually.

Regional Network

Requests are matched with suitable assessors based on the vehicle's location.

Multiple Services

From accident damage assessments to vehicle valuations.

No Registration

Customers do not need to create an account.

Direct Contact

Once the referral is successful, the assessor handles all further coordination directly with the customer.

8. Trust

Nationwide Partner Network

This section should present DKGZ as an organized and growing platform.

Once reliable figures are available, information such as the following can be displayed:

120+ Partner Assessors

80+ Regions

X,XXX Referred Requests

Only use real and verifiable figures.

Until then, a short description of the growing nationwide partner network is sufficient.

9. For Assessors

Are You an Automotive Assessor?

Join the DKGZ partner network and receive suitable customer requests from your service area.

- Define your own service area

- Add your available services
- Receive suitable requests
- Accept or decline requests
- Commission only applies to successful referrals

[Become a Partner]

This section is specifically aimed at the second target group and should remain clearly separated from the customer journey.

10. FAQ

Frequently Asked Questions

What is DKGZ?

DKGZ is a referral platform for automotive assessors.

Is submitting an inquiry free?

Yes. Submitting a request and being referred through DKGZ is free of charge for customers.

Does DKGZ carry out assessments itself?

No. The actual assessment service is provided by the respective assessor referred through the platform.

Do I need to register?

No. Customers do not need an account to submit a request.

Which assessment services can be referred?

Among others, accident damage assessments, vehicle damage assessments, vehicle valuation reports, and vehicle valuations.

How quickly will an assessor contact me?

A specific response time should only be communicated once it can be reliably maintained operationally.

11. Final CTA

Request an Automotive Assessor Free of Charge

Tell us your location and what you need. We will forward your request to a suitable automotive assessor from our network.

[Find an Assessor]

or

0800 XXX XXXXX

Free Inquiry · No Customer Account Required

12. Footer

DKGZ

Deutsche KFZ-Gutachterzentrale

Customers

- Find an Assessor

It should also be clearly stated that DKGZ operates as a referral platform and that the respective assessment service is provided by the referred assessor.

Customer Inquiry Form

The customer form should intentionally be kept short.

Step 1 – Request

- Accident damage assessment

- Vehicle damage assessment
- Vehicle valuation report
- Vehicle valuation
- Other

Step 2 – Vehicle Location

- Postal code
- City

Step 3 – Vehicle

- Make / model

Optional:

- Registration number
- First registration date
- Description
- Photos

Step 4 – Contact

- First name / last name
- Phone number
- Email address

[Submit Free Inquiry]

Below:

Free for Customers · No Customer Account Required

No password.

No lengthy registration.

No comparison of quotes.

After submission, the system automatically assigns the request to suitable partner assessors.

Design Guidelines for the Developer

The design should feel **modern and premium while deliberately remaining institutional and understated.**

Reference point: large German organizations, inspection bodies, and modern public-sector institutions — **not SaaS startups.**

Color Scheme

- **Dark blue / navy:** Primary color, approx. #0B2A4A
- **White:** Dominant background, #FFFFFF
- **Very light gray:** Subtle section backgrounds, approx. #F5F7F9
- **Dark gray:** Body text
- Additional accent colors should be used very sparingly

Layout

- Generous white space
- Clear, straight structures
- Content width approx. 1200–1280 px
- High-quality sans-serif font, e.g. Inter, Source Sans 3, or IBM Plex Sans
- Minimal border radius of approx. 4–6 px
- Thin lines and subtle shadows
- Large, clear buttons
- High-quality automotive/assessor photography
- Subtle linear icons

Avoid

No strong gradients, glassmorphism effects, neon colors, oversized rounded corners, playful illustrations, unnecessary animations, or typical startup-style visuals.

Core design principle:

Visually like a large, established organization – functionally like a modern digital platform.

Core Conversion Flow

The entire customer journey should consistently follow the same simple process:

Customer arrives on DKGZ

Understands the service

Clicks “Find an Assessor”

Completes a short form

Submits a free inquiry

System matches suitable assessors

Assessor accepts

Assessor contacts customer

The complexity remains in the background.

For the customer, DKGZ should feel as simple as possible:

Need an assessor → Submit inquiry → Get connected with a suitable automotive assessor.
